

Imperial Hotel – Hythe

Water Feature

CASE STUDY

LAM asked to attend site and survey a new build following completion of external works for a water feature. Based in Hythe, Folkstone, Kent the beautiful Imperial Hotel Hythe

Problem

Due to the time sensitive nature of this installation LAM have given the project a Fast Lead time to get the GRP Lining Completed in time for a pre booked wedding functions. Client has specified that the job is to be completed before the start of the summer.

Installation

After successful commissioning, our client was impressed with the final results.

Feedback

Solution

As part of the regeneration of the Wedding Garden, LAM were appointed by leading water specialists to install the GRP Fibreglass Lining Membrane to a new commercial water feature spanning 120 meters squared, based in the wedding garden of the Imperial Hotel in Hythe.

Completion

The Water Feature was finished off with a seamless black GRP Topcoat to specification requested to reflect the surrounding green areas and further enhance the natural environment.
